POSITIONS HELD

National Cancer Center

Research Data Scientist

Ilsan, South Korea

May, 2024 – present

Currently a research data scientist involved in developing a model to predict a prognosis of cancer patients. Beyond constructing a survival model, my responsibilities encompass bridging the gap between biostatistics and stakeholders of medical fields. One of my contributions was building an interactive web-based tool to provide predictive information and effectively convey the insights. This platform is designed to enhance patient's understanding of their cancer status and assist doctors in making data-driven decisions regarding patient care.

H&Consulting

Data Analyst

Seoul, South Korea

Feb, 2022 – Aug, 2022

As a data analyst, my primary role was to conduct data analysis and create visualizations to provide actionable insights, primarily leveraging data from a sports industry. Notable projects I undertook included identifying underappreciated athletes in the Korean Basketball League and assessing how teams could operate more efficiently from a management perspective. These projects were utilized within the company to enhance the company's consulting business in the sports sector.

Hillman Library R & Rstudio Office Hour

Volunteer Tutor

Pittsburgh, PA

September, 2023 – April, 2024

Volunteer as a tutor during weekly drop-in office hours at the University of Pittsburgh – Library System where I assist R users in the Pitt community, including students, faculty, and staff.

EDUCATION

University of Pittsburgh

Master of Arts in Statistics

Pittsburgh, PA

Sep, 2022 – April, 2024

University of Washington

Bachelor of Arts in Geography: Data Science, Minor in Informatics

Seattle, WA

Sep, 2019 – Dec, 2021
